

Getting Started

1. Download and install PanelPilotACE Design Studio for Windows from panelpilot.com/software/device-software/
2. Watch the tutorial videos in the 'Home' page of the software to familiarise yourself with the software interface and the features available.
3. Connect your display to a Windows PC using the cable provided.
4. Use the software to design your first project and test the emulator before uploading to your display.

What's In The Box?

Your display includes a panel fixing kit, seal and a mini-USB cable. You can find these beneath the plastic tray.

PanelPilotACE

PanelPilotACE Design Studio

Build your perfect display with the PanelPilotACE Design Studio, a free drag-and-drop platform that lets you create custom user interfaces without writing a single line of code.

Whether you're building a smart control panel or a data logging solution, this software provides a fast and flexible way to bring your ideas to life. Everything you need to get started is right at your fingertips.
